PROFESSIONAL SUMMARY

Results-driven Data Analyst with a background in pharmacy and healthcare operations. Proficient in Excel (Advanced), SQL (CTEs, Window Functions, Complex JOINS), Tableau, and Power BI. Experienced in building end-to-end BI dashboards, data modeling, and DAX to transform clinical, sales, and inventory data into actionable business insights. Currently pursuing the Google Data Analytics Professional Certificate.

TECHNICAL SKILLS

- **Data Analysis & Visualization:** Excel (Advanced Functions, Pivot Tables, Power Query, Power Pivot, Dashboards, Macros, VBA & DAX), Tableau (Dashboards & Interactive Visualizations), Power BI (Data Modeling, DAX, Visualization)
- **Database & Querying:** SQL — Data Cleaning, CTEs, Window Functions, Complex JOINS, Aggregation, MySQL
- **Clinical:** Pharmaceutical care, Prescription verification, Patient counseling, OTC assessment, Drug interaction screening
- **Operations:** Inventory & stock control, Regulatory compliance, Pharmacy software systems
- **Soft Skills:** High-volume customer service, Team leadership & training, Conflict resolution, Microsoft Office

PROJECTS

Pharmacy Performance & Inventory Dashboard (Power BI) | 2026

- Built an end-to-end BI dashboard in Power BI to track financial performance and supply chain health for a retail pharmacy operation.
- Designed a Star Schema data model and wrote custom DAX measures (SUMX, CALCULATE, time-intelligence) to compute KPIs including Profit Margins, COGS, and a dynamic Near-Expiry tracker.
- Created a conditionally formatted "Reorder Action List" that compares current stock against reorder thresholds — reducing stockout risk and cutting excess inventory costs.
- Delivered a two-page executive dashboard with intentional UI/UX: minimal visual noise, dropdown slicers, and corporate-grade formatting for senior decision-makers.

Hospital Performance Executive Dashboard (Tableau) | 2026

- Built an interactive Tableau dashboard to visualize key hospital performance metrics (ER bottlenecks, departmental revenue, 30-Day Readmission Rate).
- Applied data-storytelling best practices to deliver decision-ready insights for stakeholders.

Healthcare Operations & Financial Data Analysis (SQL) | 2026

- Investigated operational bottlenecks and financial discrepancies in a simulated hospital network using advanced SQL.
- Identified highest-revenue department (Orthopedics), pinpointed ER as the primary bottleneck, and calculated a 30-Day Readmission Rate of 25% using Window Functions (LAG) and CTEs.
- Cleaned demographic data with Self-Joins and excluded dummy accounts polluting the database.

Retail Sales Analysis Dashboard (Excel) | 2026

- Analyzed a \$730K+ sales dataset; built an interactive Excel dashboard with Pivot Tables and dynamic filtering.

- Identified peak revenue quarter (Q4: \$95.8K) and top customer segment (ages 36–50: \$258K+) to guide marketing and inventory planning.

PROFESSIONAL EXPERIENCE

Branch Pharmacist — El-Amawy Pharmacies (21 Branches) 2025 – Present

- Provide clinical triage for patients across 21 branches, availability, pricing, and pharmacy services.
- Assist customers with prescription--related questions and direct them to the appropriate pharmacist when needed.
- Handle incoming calls efficiently while maintaining high customer satisfaction.
- Record and follow up on customer requests and complaints accurately.
- Ensure patient safety by validating OTC requests against patient history.

Community Pharmacist — Private Pharmacy 2020 – 2025

- Dispensed and verified prescriptions in compliance with professional and legal standards.
- Counseled patients on dosage, side effects, and drug interactions; collaborated with physicians on complex cases.
- Maintained complete documentation and ensured full regulatory compliance.

EDUCATION

Bachelor of Pharmacy (Pharm.D) — Al-Azhar University, Cairo

CERTIFICATIONS

- Google Data Analytics Professional Certificate (In Progress) — Coursera
- Module 1: Foundations: Data, Data, Everywhere — Coursera (Verified)
- Module 2: Ask Questions to Make Data-Driven Decisions — Coursera (Verified)

LANGUAGES & DEVELOPMENT

- **Languages:** Arabic (Native) | English (Upper Intermediate — conversational & clinical reading)
- **Currently Learning:** Python | Advanced Statistics
